notice/deposition

august 17, 2026

don mcdaniel

104 east main street

room 101

lancaster ohio 43130

to don macdaniel: a man; who sometimes acts as mayor of lancaster:

i: keith alan mauger: a man; do claim harm resulting from “vaccine” shedding, also known as horizontal transmission;

i, do claim that the harm began upon the distribution of the covid bioweapons, masquerading as “vaccines for the prevention of covid 19,” and continues to this day;

i, do affirm that you, through duty to participation and lack thereof in the county district advisory committee and acting as lancaster mayor, are responsible for such distribution and availability;

i, do ask; after 566 days from the first notice sent to you, a man, don macdaniel, have you researched the shedding, horizontal transmission effects from the so-called vaccine?

i, do ask; after 566 days, can you as a man justify how your protection of woman or man such as i, living on fairfield county, was effective?

i, do ask: are the policies, practices, and implementations of the fairfield county health department different now than they were 566 days ago?

i, do ask: how are you and the fairfield county health department informing the man and woman on fairfield county of the risk of shedding, horizontal transmission from the "vaccines"?

i, do ask: after much disclosure over the last few years of the bioweapon, called "vaccine," how is your view of your actions as a man related to your perspective of 566 days ago when you received notice; and if you knew then what you know now, would you, as a man, have done anything differently in response to this claim of harm against i, or other fairfield county man and woman?

i, do ask: through what thought process or by what motive did you choose to favor statutory code over rule of law?

i, do ask: can a man hold in his consciousness the fact of harm done to others and hide behind a title to disregard guilt?

i, do state: i have many a man and woman who will attest to this fact of shedding and the difficult effects they are experiencing to date;

i, do state again: this claim is still unanswered after 566 days and stands as trespass by way of harm done by massive transmission of the bioweapon administered by the fairfield county health department, under your watch, and which has caused very much harm and loss to man and woman on fairfield county, not to mention the profoundly invasive loss to those who were tricked into receiving this "vaccine";

i, do state: this claim has been sent to federal district court;

i, do state again: losses due to shedding include:

anxiety, stress, health issues such as sinus pressure, congestion, swollen lymph nodes, eye irritation and hemorrhage; malaise, brain fog and feeling dazed, mood swings, sore throat, aching chest pain; and an increase in static electricity from my body; all shortly after known exposure; these have happened repeatedly and still happen to this day;

grief over loss of connection to soulful companions;

concern of great potential for disease due to dna damage;

existential disquietude over potential loss of identity due to dna degradation;

i, do affirm that i, did not and still do not consent to the entry of nanotechnology and other “vaccine” toxins into my cells or body;

i, do affirm that such entry does violate my religious values and constitutional rights, and disregards the natural law given by the creator of all that lives on earth;

i, bring forth the current knowledge that all serums labeled “vaccine” have great potential to cause great harm, including damage to the bioelectric energy systems of all living beings and to the human genome; many documents and studies are available for your research;

i, do require that you cease and desist all distribution and availability of all mrna nanotechnology “vaccines,” and remove all alleged “information” and advertizing on your website; submit sealed

vials to qualified experts for forensic investigation; and order the cessation of distribution from all hospitals, doctors offices, pharmacies, and clinics on fairfield county;

i, do ask: how do you as a man intend to repair this wrong done by you and the fairfield county health department on the man and woman who live on fairfield county?

i, do state: as of january 28 2025, i, did demand remedy for the above-mentioned harms, in the amount of two-thousand and seven-hundred troy pounds of silver plus one-hundred troy ounces of silver per day that the availability of these injectables continues; that date is now 566 days past;
