donald john trump

c/o office of the president of the united states

the white house

1600 pennsylvania avenue

washington, dc 20500

warmest greetings to the man, donald john trump, who do sometimes act as president of the united states of america;

i, crisrina marni delia, a living woman, do write you today as inquiry and statement of my heartfelt position on several matters which affect all mankind, especially those living man and woman on the land commonly known as America, a peaceful perpetual union of the several states;

it has come to my attention that the man, robert francis kennedy junior, who do sometimes act as secretary of health and human services also on behalf of We, The People, consisting of mankind naturally born onto the land of these same peaceful perpetual union of states, recently reversed his adamantly stated and wildly popular health-restorative mission to ban the toxic carcinogous forever chemical glyphosate, commonly known under it's market brand name of roundup, made by monsanto; i, did observe that on thursday, february 18, 2026, you did issue an executive order listed on the national register as #14387 affirming determined support for this same chemical as a matter of national defense; this conflicts in the most extreme many undisputed facts: due to it's pervasive presence in the majority of American food products has caused most of the rest of the world to not only refuse to import our foods but to outright ban them as being unsafe for human or animal consumption, many massive class action law suits where the manufacturer admits the chemical's toxicity and detriment to all life; i, would beg that the lessons of Sri Lanka be learned from while still adhering to robert francis kennedy junior's health and human services department's diligently researched position, at least utilizing a phase out similar to the phasing out of American reliance on foreign oil?

i do respectfully pray of you for these changes, unless it is your intention to pander to the likes of giant corporate farming operations and their toxic chemical industry owners with EO 14387, contradicting mounting admissions by all US and worldwide medical, scientific and even legal industry professionals that glyphosate is a true tool of trespass harms onto all life?

further concern have i over the inaugural speech given by you, for the united states institute of peace - board of peace, where your very many expressions of the successes and goals for said board of peace revolve almost exclusively around improving the lot of israel; *while it is understood* that less contentious relationships between all world powers are crucial as this means less reasons that the man and woman living on America might be looked to for assistance in protecting worldwide peace, the numbers cited in American taxpayer dollars being sent for these efforts fairly boggle the mind of anyone existing in a financial reality 'less than the 1%'; so i do ask, how do these efforts abroad compare to efforts being made at home, to improve the lot of each and every man and woman born naturally on America? do efforts towards helping Americans who are starving, homeless, living in squalor and addiction on the streets here at home appropriately outpace efforts abroad?

finally, of alarming concern to i and my peers, is your incongruous support of the financially floundering united nations; you unequivocally stated a fiscal commitment in your board of peace speech to fund the united nations ten billion dollars; even with the wildly propagandized mainstream media censorship, the video footage was profuse of thousands of caravans of illegals flooding over every border into America, for more than a decade, clearly labeled and attributed to the united nations; that this organization bankrupted itself to overwhelm American borders and bankrupt us as we were forced to fund these criminals with our tax dollars as we watched our basic needs skyrocket out of reach of more than half the natural population is breathtaking in it's moral destitution;

let me be clear on this point: you state repeatedly that you are told your policies are making life more affordable for americans; your statisticians are getting false information; in the last three months, grocery costs have increased by 33% for the average American in my average Midwest suburban existence; meanwhile, as one example, the 'corresponding increase' in EBT benefits has increased three DOLLARS in the last 10 years. if americans can't feed their families, what difference do decreased mortgage rates make? The only people benefitting from selective tax and mortgage decreases are those who live above the middle class; Americans making less than \$100k/year are struggling to live paycheck to paycheck due to the inflation and corporate greed promoted by 14,000 pages of tax loopholes; I respectfully offer the fact that the US government has currently established 'poverty level' income at \$15,960; This gross disparity between what is declared as being worthy of support and the reality of actual cost for bare minimum subsistence is, quite frankly, inexcusable.

i, cristina marni delia, live in a state of hope that our Creator gave each of us a mission and a purpose to benefit the greater good by exercising the responsibilities that come with our unalienable rights; i am grateful to know that my obligation to communicate with those who

volunteered to represent We, The People is respected by yourself, as a man, and in your capacity as the honorable president of the united states;

i do implore of you consider my peaceful prayer on behalf of all mankind on America for relief to these extreme and challenging circumstances; oftentimes the censorship and propagandization of even the simplest of situations causes the public to wildly misunderstand; thank you for clarifying these matters so that Americans can once again stand together in peace instead of be divided in fear and confusion;

with kindest regards and deepest thanks for your precious time and consideration,

/s/ _____
