

## ***affirmation of true fact***

February 22, 2026

russell mock

c/o loveland mayor's court

126 south lebanon road

loveland, ohio 45140

kind greetings to the man, russell mock, who do sometimes act as magistrate for loveland, ohio;

i, cristina marni delia, a living woman do write you today in support of the claim of harm of the woman; beverly j welbourne against (name) and (name) on the evening of Thursday 18 February, 2026;

i, do hereby affirm the claim of harm done to beverly by the man who do act as traffic control officer, ben, as true fact; as she and many a man and woman are frequently harmed by horizontal transmission 'shedding' from vaccinated persons;

i, have experienced symptoms of harm from shedding on regular interactions with the vaccinated, and so do recognize many of the symptoms described by beverly; i have many of the same on numerous occasions in the last six years;

i, cristina marni delia, have indeed witnessed her recent illness from the man, ben, acting as policy enforcer in a recent traffic stop of beverly on 2/18/2026; I am eager to affirm same in a lawful court of record;

i do implore of you to do research on this subject, as horizontal transmission 'shedding' is doing much harm to mankind and needs to be recognized, acknowledged and addressed; at least in as much as the unvaccinated have the right to be advised of active bioweapon presence; I do assert it is the right of mankind to refuse to accept being subjected to such horizontal transmission, and the responsibility of the vaccinated being to openly inform of such active grave threat at the onset, especially in forced interactions such as the above discussed traffic stop;

i do affirm the foregoing to be true and complete to the best of my knowledge and understanding and eagerly seek opportunity to testify to same in an open court before a competent magistrate and a jury of peers of the woman, beverly welbourne..

further affiant sayeth naught.
