motion to compel response

greetings to chelsey vascura: a woman; who sometimes acts as judge:

i: keith allen mauger: a man; do find that man and woman: r joseph ebel, steven davis, don mcdaniel, branden c meyer, chasity page, roger e binette, steven bechtel, craig a hecht, anna downing; do not respond at all to multiple correspondences including deposition/interrogatory;

i, do move that you, the woman, acting as the court, compel the above to participate in the discovery process;

because i, believe that all above are vaccinated, and find it likely that an in-person meeting would cause harm, i, do wish to proceed through written correspondence;

or, understanding that the lack of rebuttal—to all notices and correspondences beginning january of 2025—regarding the asserted facts does imply acceptance and admittance, and if the verification is to hinge upon this lack of rebuttal above all else, then i, shall consider making request for summary judgment; the stipulation against adjudication by a vaccinated person applies only if the adjudication rests upon whether or not horizontal transmission exists, as, in such instance, the adjudication could imply the vaccinated judge in the cause of action;

i, do emphasize the length of time since the original notices were sent: a year and nine months; i, do consider this large temporal discrepancy non-amendable, in terms of first, fourth, seventh, eighth, and ninth amendment rights, and in terms of honorable behavior under common law;

i, await your reply.

thank you,

keith allen mauger
